

Outpace Supply Chain Disruption with Proactive Intelligence

Whether you are manufacturing yoga pants or missile defense systems, you're grappling with complex supply chains. The data is quickly multiplying, but it's often inconsistent and always overwhelming.

Get ready to transition from alert overload to operational relevance. Exiger created Proactive Intelligence to bridge the large gap between current third-party and supply chain data and the insights necessary to propel our customers further along the decision-making curve.

Transform Your Supplier Decision Paradigm

Progress from a morass of supplier and market information to pinpoint intelligence on value chain dependencies, future chokepoints and strategic operational opportunities.

 **INFORMATION**

GET ACCURATE, COMPLETE AND UP-TO-DATE VENDOR INFORMATION, ENSURING IRRELEVANT OR CONFLICTING DATA DOESN'T AFFECT YOUR RISK DECISIONS.

STREAMLINE AND ACCELERATE YOUR COMPLIANCE AND INVESTIGATION TIMELINES.

 **INSIGHT**

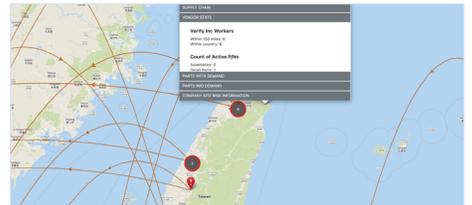

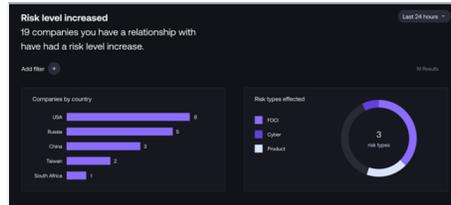

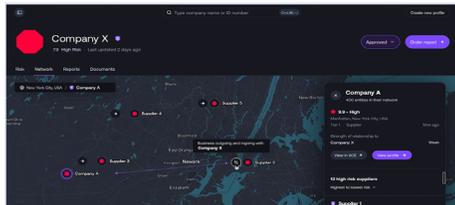

ILLUMINATE ALL CONNECTED PARTIES, DEPENDENCIES AND VULNERABILITIES IN YOUR SUPPLIER NETWORK TO PRIORITIZE THE MOST VULNERABLE AND THE MOST IMPORTANT.

DON'T GET LOST IN SUPPLIER RISK. FOCUS YOUR RESOURCES WHERE IT WILL MATTER FOR YOUR ORGANIZATION.

 **IMPACT**

UNDERSTAND HOW AN INDIVIDUAL EVENT, A MARKET SHIFT OR A MATERIAL SHORTAGE – FROM NATURAL DISASTERS TO GEOPOLITICAL CONFLICTS TO FORCED LABOR ENFORCEMENT – WILL IMPACT YOUR OPERATIONS.

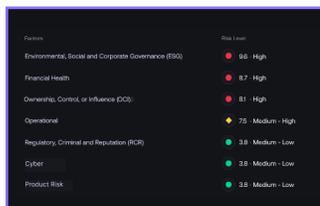

SEE THE FOREST AND THE TREES. PREDICT THE IMPACTS OF SUPPLY CHAIN DISRUPTION OR VALUE CHAIN COMPETITION BEFORE THEY UNFOLD.

What You Need to Know – and Nothing More – for Supply Chain Resilience

Move from data to insight . . . to answers. Our proprietary risk model and AI cuts through the noise:

- **Enhancing data consistency, quality, and recency** by consolidating disparate sources into a single, defensible source of truth for effective planning, analysis, and risk mitigation.
- **Enabling you to adopt a predictive approach** by analyzing extensive data on millions of suppliers. We assess changes in resilience and risk, unearthing unique patterns that can correlate to previously hidden threats – such as how a supplier's deteriorating financial health can impact their likelihood of a cyber breach.
- **Illuminating value chain competition** that may be driving your business – or driving you out of business – and can create supply chain opportunities.

As part of the **1Exiger platform**, Proactive Intelligence enhances the visibility and management of risks, issues, and complexities across the entire supply chain. It empowers major corporations and governments with advanced predictive risk analytics, complete and accurate supplier data, and insights into supply chain crises – from natural disasters to infrastructure failures and geopolitical conflicts – in real-time. The result is actionable intelligence that can increase the speed of procurement and drive a competitive advantage.
